

ProA SealCare™

Maximising your critical plant seal performance

At Nash we take a proactive approach to maintaining your mechanical seals. Whether you have a seal reliability problem or need a seal refurbishing we aim to ensure you obtain the maximum performance from your plant.

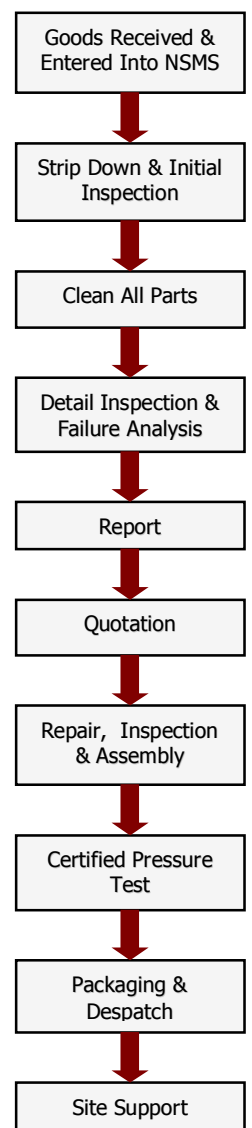

Fast and cost effective any brand seal repair on:

- **Pumps**
- **Compressors**
- **Agitators**
- **Mixers**
- **Reactors**
- **Bead mills**

Our mechanical seal maintenance service extends beyond a like-for-like repair. Our approach ensures that we consider all aspects of the seal condition and operation history to determine the root cause of any problems.

If required we will recommend actions to improve your seal performance and provide site support to ensure it is fitted and re-commissioned correctly. Our service extends to help you monitor seal performance against agreed criteria and implement any further action.

Nash is the leading independent mechanical seal service provider in the UK. For fast any brand mechanical seal repair ProA SealCare™ is the first choice.
