

# ProASiteCare™

Maximising your critical plant seal performance

Your plant output depends on the reliable operation of mechanical seals and rotating equipment.

The Nash ProA SiteCare™ service plan aims to improve your mechanical seal performance to ensure maximum plant availability.

## Our objective is to help you to:

- **Maximise plant output**
- **Focus on core business**
- **Identify worst performers**
- **Increase reliability**
- **Increase MTBF**
- **Reduce downtime**
- **Reduce repair costs**
- **Manage & rationalise stock**

Tailored to meet your needs, our flexible service plan can be performance driven to meet agreed targets or based on a simple sole supplier agreement with stock management for the site. The service can be extended to cover the maintenance of associated rotating equipment.

**Nash is the leading independent mechanical seal service provider in the UK. For site wide mechanical seal repair and reliability management ProA SiteCare™ is the first choice.**
